MATERIAL SAFETY DATA SHEET

MANUFACTURED BY: MT. SAVAGE SPECIALTY REFRactories CO., INC.
736 WEST INGOMAR ROAD
INGOMAR, PA  15127

GENERAL PHONE:  (412) 367-9100
PREPARED BY: Director of Technical Services
INFORMATION:  (301) 264-3595
REVISION DATE: November 8, 2013

PRODUCT DETAILS

PRODUCT NAMES: SAVAGE SUPER RAM, SAVAGE RAM 60, 70 AND 85 including suffixes AS, S and QF
COMMON NAME: Fire Clay Refractory Plastic
CAS NO: Mixture

PRODUCT COMPOSITION / HAZARDOUS INGREDIENTS

These products are composed of a blend of processed alumina-silicate earth minerals (including calcined and uncalcined clays and aggregates). Upon firing to ceramic temperatures they form a hard ceramic bond for refractory materials. Dust generated during manufacture, installation and tear-out may pose a respiratory hazard if exposure is sufficient.

See below for additional health hazard information.

PHYSICAL, CHEMICAL AND FIRE & EXPLOSION HAZARD INFORMATION

PHYSICAL PROPERTIES:
- Appearance / Odor: Granular solid, brown to buff color, no distinct odor
- Melting Point: Greater than 2000°F
- Density (as shipped): Specific gravity = 2.0 – 3.0 (water = 1)
- Solubility: Slightly soluble in water
- pH: 6 – 7

CHEMICAL REACTIVITY:
- No known hazardous reactions, decomposition products or polymerization

FIRE & EXPLOSION:
- Non-flammable; no applicable flash point
- Hardened product which has not been properly dried is subject to explosion upon rapid heating due to internal steam pressure
SAFE HANDLING PRACTICES AND EXPOSURE CONTROL MEASURES

- Care should be exercised to prevent generation of dust during handling, installation, use and tear-out. Avoid skin and eye contact and breathing of dust. Do not ingest.
- Proper refractory practices must be followed for curing, dry-out and firing to service temperature.
- Wash skin and clothing with soap and water after contact with material.
- Appropriate control measures include dust prevention, dust containment and ventilation supplemented by the use of appropriate NIOSH approved respirators for the exposure conditions.
- Safety glasses should be used if splashing is likely. Impervious gloves, boots and protective clothing should be used as needed to prevent excessive skin contact.
- Clean-up of spills should be done in a way to minimize dust, including vacuuming and wet methods.

FIRST AID

- Respiratory Distress – Remove to fresh air. Give CPR and Oxygen if needed.
- Skin Irritation – Wash irritated areas gently with soap and water to avoid abrasion. Skin lotion may relieve irritation. If irritation is not relieved within several hours consult a physician.
- Eye Exposure – Flush eyes with water or eyewash solution for 15 minutes and get prompt medical attention if relief is not obtained immediately. DO NOT RUB EYES!! Injury due to abrasion may result.
- Ingestion – do not induce vomiting. Give a cup of water if conscious.

ENVIRONMENTAL AND REGULATORY INFORMATION

DISPOSAL: Dispose in accordance with federal, state and local regulations. Dispose per 40 CFR 261 and 262.

ECOLOGICAL INFORMATION: This product is composed primarily of earth minerals and is not expected to have an ecotoxic effect.

TRANSPORTATION: This product is not DOT classified.

REGULATORY INFORMATION:

Canadian WHMIS – D2A
OSHA 29 CFR 1910.1200 – considered hazardous
EPCRA Section 302 (Extremely Hazardous Substances) – not listed
CERCLA Section 304 (Title III) not subject to reporting

SARA 313 – not subject to reporting
SARA Hazard Category – "Chronic Health Hazard"
California Prop. 65 – "Contains crystalline silica, an ingredient known to cause cancer."

This information is given in good faith. Suitability of the product for the application and installation conditions are critical to the safety of the product. These conditions are subject to the control of the user and all risks of use of the product are assumed by the user. For guidance on use in specific applications consult MT.
